Engineer II | Java/Spring Boot/ AWS/Digital Marketing | Building AI Agents, RAG & LLM Applications | Technical Product Management
Cupertino, California, United States

Summary

I'm a Senior Software Engineer with over a decade of experience building and modernizing enterprise platforms, and I’m increasingly operating at the intersection of product, business, and engineering. In my current role, my responsibilities extend well beyond software development. I lead discovery, impact analysis, requirements, stakeholder alignment, solution design, user stories, testing, and release readiness across multiple enterprise applications. My engineering background gives me a strong advantage in technical product management: I can understand customer and business needs while also evaluating architecture, APIs, data, dependencies, technical feasibility, risk, and implementation trade-offs. I’m also building hands-on experience in Generative AI, including AI agents, LLMs, RAG, vector databases, MCP, Databricks, and prompt engineering. I created CareerFolio, an AI-powered career platform - FWA AI Hackathon winner, and currently mentoring teams building AI applications, knowledge bots, and automation workflows. I’m now looking to bring this combination of product thinking, technical depth, and AI experience into a Technical Product Manager or Product Owner role focused on taking problems from discovery through delivery and creating measurable customer and business value.

Experience

Mutual of Omaha
7 years 7 months

Engineer II
October 2022 - Present (3 years 11 months)

Engineer I
January 2021 - October 2022 (1 year 10 months)
Omaha, Nebraska, United States

Application System Analyst

February 2019 - December 2020 (1 year 11 months)
Omaha, NE

Tech Mahindra
Technical Team Lead
September 2015 - February 2016 (6 months)
Pune, Maharashtra, India

Tech Mahindra (formerly Mahindra Satyam)
6 years 11 months

Onsite Coordinator
January 2013 - November 2014 (1 year 11 months)
Omaha, Nebraska, United States

Team Lead
February 2011 - January 2013 (2 years)
Pune, Maharashtra, India

Gained Travel & Logistics domain expertise, working on projects for Union Pacific Railroad (UPRR). Took on team leadership responsibilities, mentoring peers, oversaw task assignments, code reviews, and ensured quality standards across the team. Led key functionalities in the Employee Quality Management System, demonstrating strong technical and project management skills. Adapted to evolving technologies and challenges, fostering a growth mindset and continuous learning. Worked closely with on-site team and clients, ensuring smooth project execution while addressing technical challenges and stakeholder expectations.

On Site Coordinator
September 2010 - February 2011 (6 months)
Omaha, Nebraska, United States

Software Developer
January 2008 - December 2010 (3 years)

My first professional experience, where I developed both technical expertise and essential soft skills. Worked in the Travel & Logistics business unit for a U.S. railroad client (Union Pacific Railroad - UPRR), contributing to the implementation of an Employee Quality Management System. This system included modules for employee licensing, training, incident reporting, performance scoring, and reviews.

Education

University of Nebraska at Omaha

Master of Science - MS, Management Information Systems, Data Analytics · (August 2018 - May 2021)

University of Nebraska at Omaha

Graduate certificate, System analysis and design · (August 2018 - May 2021)

Pt. Ravishankar Shukla University

Bachelor of Engineering and Technology - BE , Computer Science · (2003 - 2007)

St Xavier high School, I.C.S.E board - Raipur

High school, Science and Mathematics
